# Sai Teja B

Software Engineer  
Frisco, Texas, United States

## Summary

I'm a full-stack software engineer with a passion for building cloud-native solutions using Python, Terraform, Docker, React, and AWS. I enjoy solving real-world problems through clean, scalable code — and have a growing interest in infrastructure automation and developer tooling.

Alongside engineering, I'm a curious learner and a published researcher in the field of Business Analytics. I've also explored the creative side of technology through video editing and vlogging, combining my love for storytelling with my technical background.

I thrive in remote-first environments that value ownership, continuous learning, and meaningful collaboration. Whether it's contributing to team goals, experimenting with new technologies, or editing a video from a different timezone — I bring energy, adaptability, and a growth mindset to everything I do.

---

## Experience
