

SAI TEJA BHOOMRAOGARI

SOFTWARE ENGINEER

Austin, TX · saitejabhoomraogari1508@gmail.com · linkedin.com/in/saitejapro · github.com/saiteja-pro

SUMMARY

Software engineer running a one-person platform function for a 30-engineer organization, building the internal tooling that keeps releases stable and engineers fast. Works mostly in Python across AWS and Azure DevOps, and owns each tool from the Terraform underneath to the tests that catch bugs before they ship. Strongest in automation, CI/CD, and the infrastructure work that takes manual steps off the team's plate for good.

EXPERIENCE

Software Engineer | SAIF Corporation

Nov 2022 – Present

Remote

- Built and owned the Python data-validation and ETL framework covering 53,000+ policyholders and roughly 37,000 claims a year, catching schema and integrity errors before release.
- Wrote a Jinja code generator that produced ready-to-run unit test templates across 20 to 25 APIs, saving 6 to 8 hours per suite and adopted by 15 engineers.
- Built a one-click smoke test runner with a self-serve UI that let any engineer validate on demand, cutting about an hour of manual checks per run across twice-weekly releases.
- Led the GitLab to Azure DevOps migration end to end, moving 5 repositories and 35 pipelines in one week with no break in delivery.
- Developed an alert snooze manager that muted known escalations for set windows, cutting false alert noise by 40% for on-call engineers and stakeholders.
- Created a cert-renewal validation tool that tracked 29 certificates and alerted 15 days before expiry, and provisioned the AWS stack (S3, RDS, Lambda) in Terraform for reproducible environments.

Graduate Research & Teaching Assistant | UT Arlington

Apr 2022 – Aug 2022

Arlington, TX

- Taught business statistics coursework and supported faculty research on analytics adoption.

Kindle Direct Publishing Analyst | Amazon

Feb 2021 – Jul 2021

Hyderabad, India

- Reviewed Kindle Direct Publishing workflows and content quality, flagging gaps that fed pipeline fixes.

Device, Digital & Alexa Support | Amazon

Aug 2019 – Jan 2021

Hyderabad, India

- Resolved escalated Alexa, Kindle, and Fire device cases that moved past the first support tiers.

SELECTED PROJECTS

DealEdge: AI Negotiation War Room

3rd of 12 teams, SAIF IT Hackathon 2026

Built an AI negotiation coach solo, with strategy briefs, an interactive roleplay mode, and live voice-to-voice practice. *Next.js, React, TypeScript, OpenAI API, speech-to-text*

NLP Summarization Engine

UT Arlington capstone

Built an end-to-end pipeline that scraped roughly 12,000 companies and ran the data through a fine-tuned model to produce short business summaries. *Python, HuggingFace, Selenium, Pandas*

TECHNICAL SKILLS

Languages: Python, SQL, JavaScript, TypeScript

Backend: REST APIs, Flask, Django, ETL pipelines, microservices, unit and integration testing, Jinja2

Cloud & Infrastructure: AWS (S3, RDS, Lambda), Terraform (IaC), Docker

DevOps & CI/CD: Azure DevOps, GitLab CI, Jenkins, Sauce Labs, smoke and regression testing, release automation

Reliability & Data: Monitoring, logging, alerting, incident response, root cause analysis, Pandas

EDUCATION

M.S., Business Statistics

2021 – 2022

University of Texas at Arlington

B.Tech, Electrical & Electronics Engineering

2015 – 2019

Jawaharlal Nehru Technological University
